

# UNOFFICIAL LISTS

The following casualty lists have been reported by special correspondents, but have not been officially reported nor have the relatives been informed of such casualties in regard to the list, the Times-Journal wired its agents at the capital to make diligent inquiry if such casualties were on file, and their reply was that if such casualties were reported they were not available. This does not prove the following list is incorrect or vice versa. It merely means that it is impossible to get any verification and the list is therefore published by the Times-Journal as "unofficial."
